

Leading European service provider for the mining industry

Geotest Consulting Engineers
provides full-service support to
customers of the mining
industry

About

We have an accumulated experience of over 22 years having successfully delivered a wide range of projects including exploration, geotechnical drilling, resource upgrade/infill and mine design & planning projects for European customers.

Strategy

We constantly invest in maintaining a young and expanding drilling fleet while looking for opportunities to enrich the offered range of complimentary services.

Our continuous effort aligns with maintaining high-productivity, provide full-service mining support to clients and achieve a robust balance sheet.

Health & Safety

We have the policy of committing uncompromisingly to the occupational health and safety of our employees and working places.

*We retain a zero LTI
for the last 4 years*

Initiatives

We are proud to having established our inhouse safety monitoring system that enhances safeness at the workplace, mitigate operational risks and help maintain a high productivity on our operations.

- constant personnel training
- standard operating procedures
- safety walks
- random site inspections
- stop work hierarchy

European Presence

We focus on the European market where we ran several consulting and drilling projects in diverse operational environments.

-  Headquarters and Maintenance Center
-  Registered Offices
-  Operations

Capability statement

We provide quality supporting services across the mine cycle

Exploration drilling

9 surface drilling rigs and equipment, on-truck/crawler/skids options, diamond drilling, destructive drilling, core orientation, downhole survey, geological and geotechnical logging, borehole imaging

Production drilling

6 underground drilling rigs and equipment, diamond drilling, resource upgrade, downhole survey, core orientation

Geotechnical research

Rock mass classification, slope stability analysis, risk analysis, geotechnical laboratory testing

Mining support

3D geological model, R&R estimation, open pit strategic pit design, U/G stopes optimization

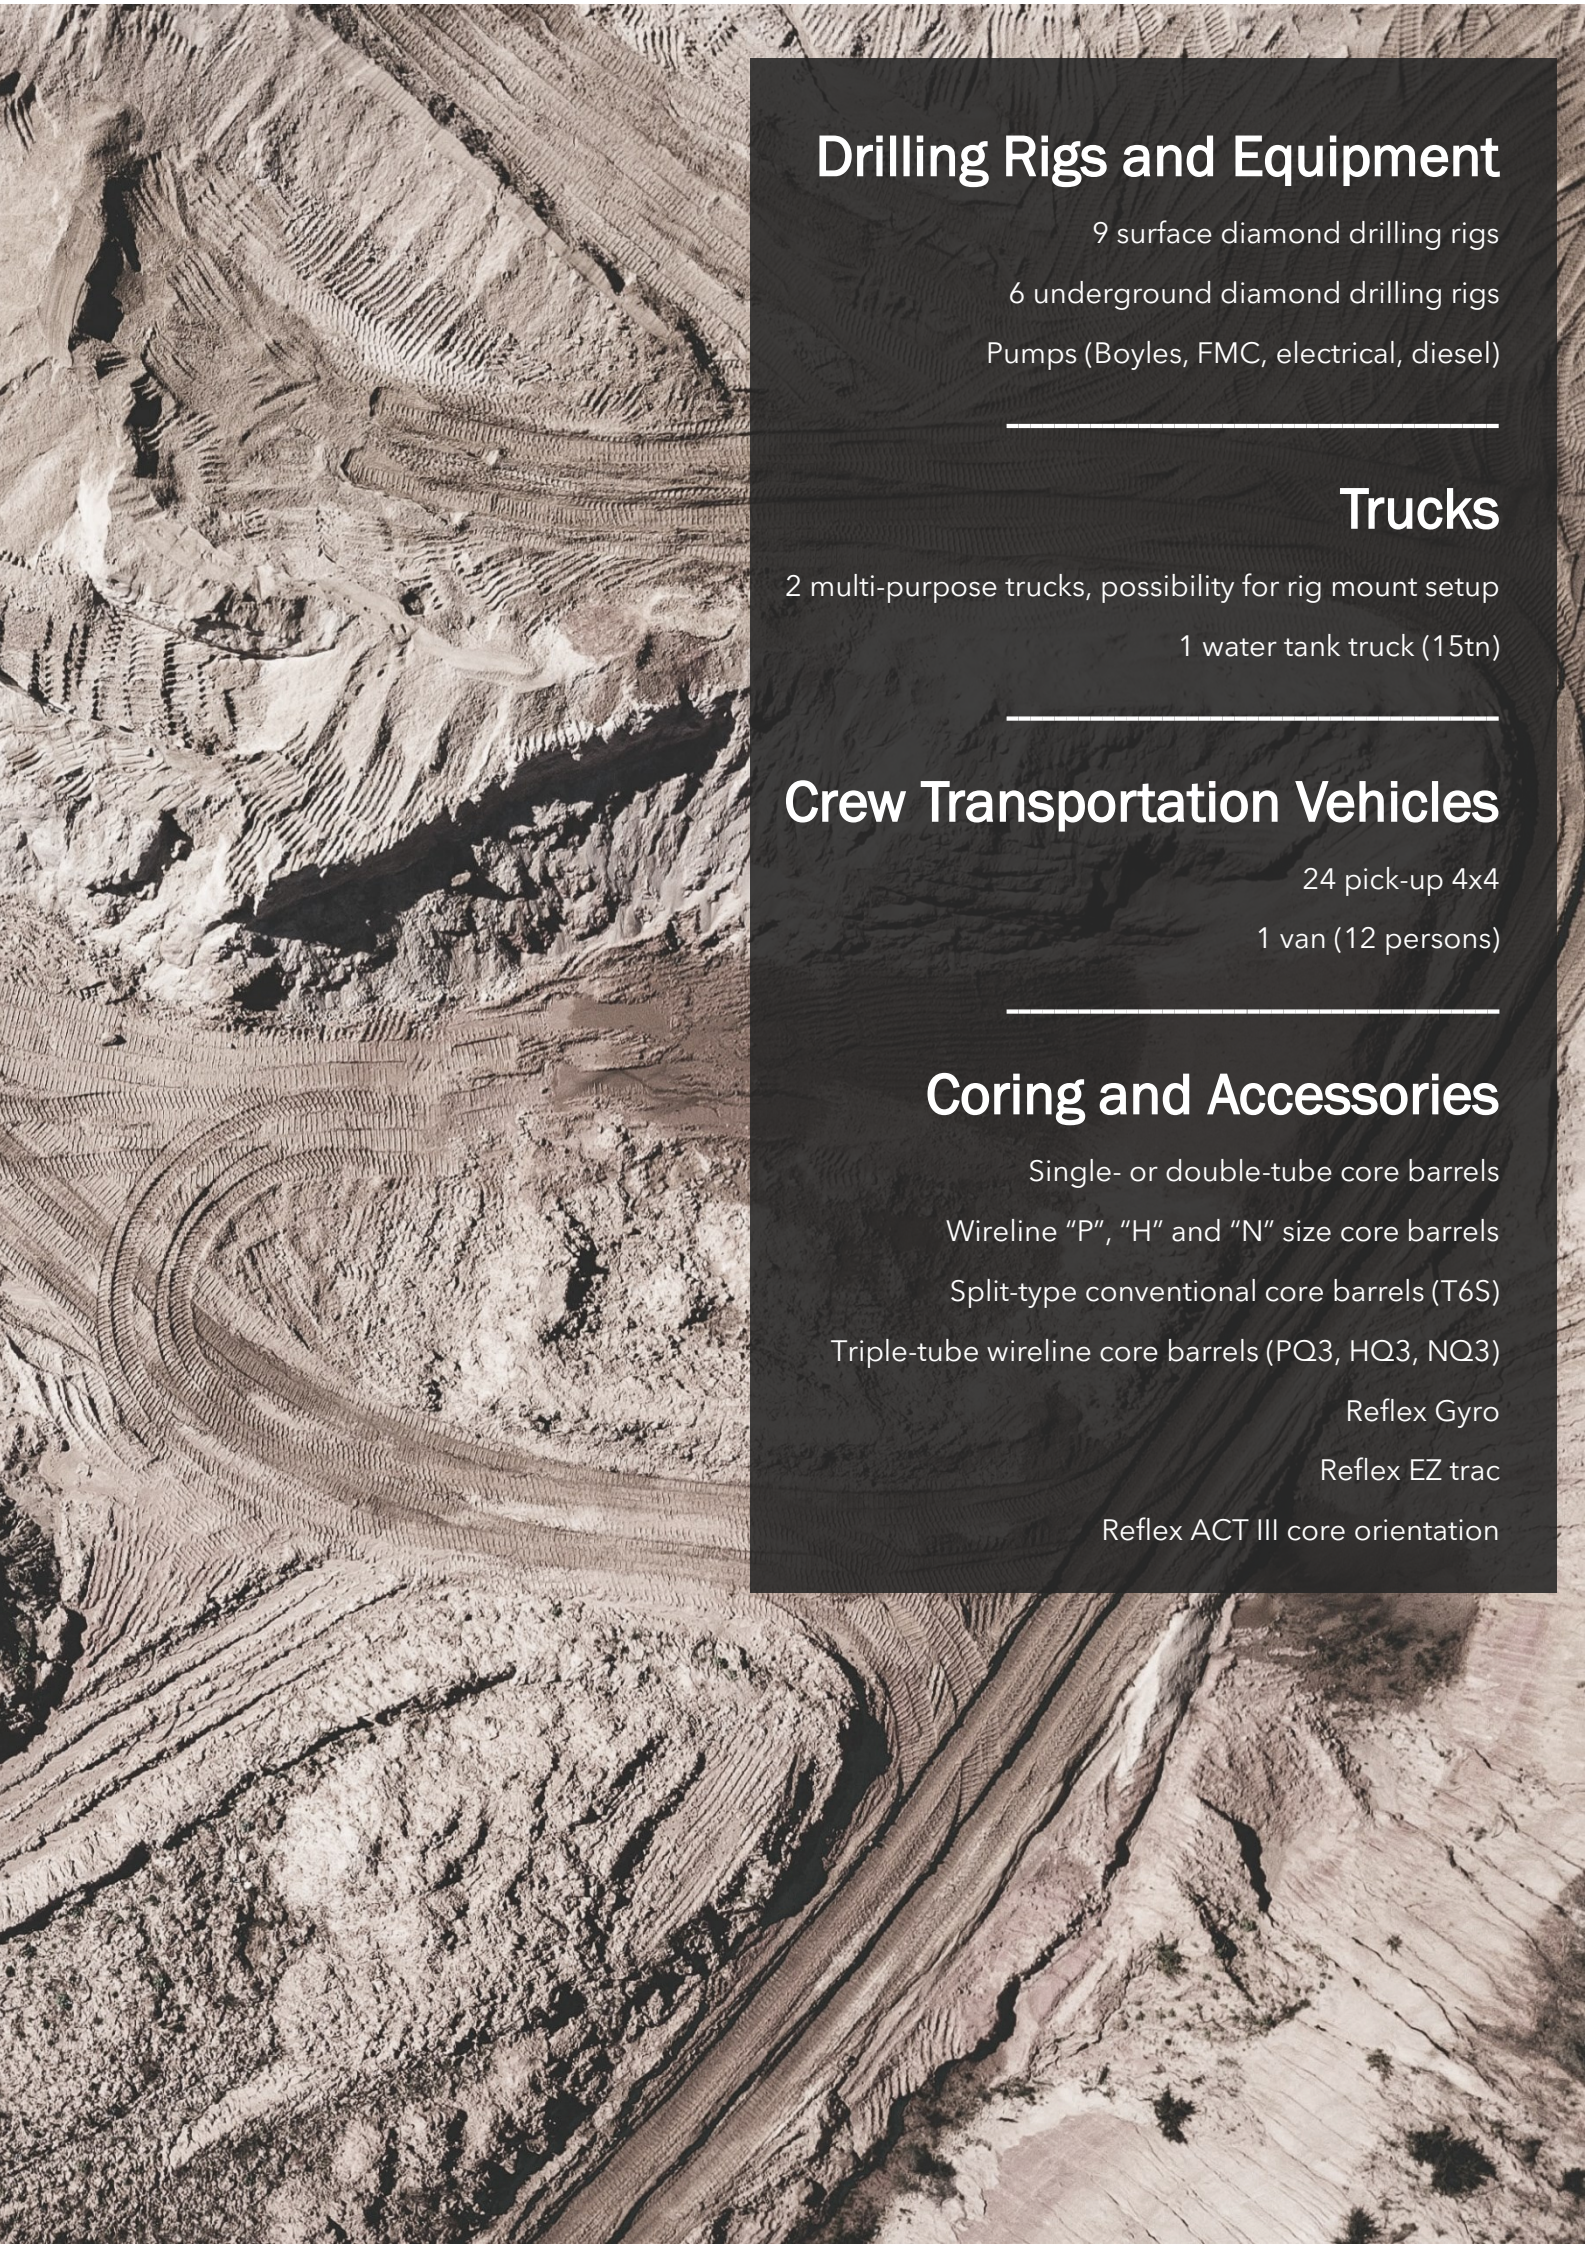

Client Base

We closely work with:

Supplier List

Drilling Rigs and Equipment

9 surface diamond drilling rigs

6 underground diamond drilling rigs

Pumps (Boyles, FMC, electrical, diesel)

Trucks

2 multi-purpose trucks, possibility for rig mount setup

1 water tank truck (15tn)

Crew Transportation Vehicles

24 pick-up 4x4

1 van (12 persons)

Coring and Accessories

Single- or double-tube core barrels

Wireline "P", "H" and "N" size core barrels

Split-type conventional core barrels (T6S)

Triple-tube wireline core barrels (PQ3, HQ3, NQ3)

Reflex Gyro

Reflex EZ trac

Reflex ACT III core orientation
